1. Staple / synthetic carpets

These carpets are made from synthetic fibers, unlike most other types of carpets produced in India. The purposes of these types of carpets are derived from its superior strength when compared to carpets made from natural fibers or yarn. These have various applications in textile industries, military purposes, industrial purposes and horticulture etc. Synthetic carpets are not very good for human health in general.

3. GABBE Woolen Carpets

Primarily and largely produced in the Bhadohi-Mirzapur regions of Uttar Pradesh, GABBE Woolen Carpets follow indigenous and unique tradition of various tribal patterns which are very antique and elegant. The unique weaving and coloring techniques make these carpets one of the most sought after and costliest carpets that is available in India as of now. Though exact compositions of the fibers are unknown, they are generally made of 25% cotton and 75% wool.
