Wool and Woolen Textile Industry

India is the seventh-largest producer of wool in the world with a global production share of nearly 1.8 per cent. India's wool consumption was estimated at 135 million kg. This is expected to increase to 260 million kg by 2019–20.

India's wool and woollen textile industry is the seventh-largest in the world. India's wool and woollen industry can broadly be divided into 10 major product categories: worsted yarn, woollen yarn, wool tops, fabric (woollen/worsted), shoddy yarn, shoddy fabrics, blankets, knitwear, hand-made carpets and machine-made carpets.

EXPORT

The US and the EU are key export destinations for Indian wool and wool-blended products. Indian exporters are geographically diversifying their exports to other regions such as the Middle East, Latin America, South East Asia, and East Asia to increase their footprint globally.

Exports of wool and wool-blended products (including ready-made woollen garments, woollen yarn, fabrics, made-ups and woollen hand-made carpets) totalled US$ 1,869.8 million.

Wool exports (including wool yarn, fabrics, made-ups, readymade garments of wool and woollen hand-made carpets) stood at US$ 1,869.8 million. Woollen hand-made carpets contributed 72.7 per cent to total woollen exports. The US and EU are the key importers of Indian wool and wool-blended products.

The export of wool and wool-blended products from India (readymade garment wool, woollen yarn, fabrics and made-ups) was US$ 2,326 million.
